## Professional Summary

Full Stack Software Engineer pursuing a Master's degree in Taiwan while working full-time after converting from internship to Software Engineer. Experienced in React.js, Next.js, TypeScript, Node.js, MongoDB, MQTT, Redux Toolkit, Tailwind CSS, and real-time systems. Strong background in healthcare dashboards, IoT monitoring, authentication, state management, frontend architecture, and payment integrations. Regularly use AI tools to accelerate development, testing, debugging, and code review workflows while making final technical decisions independently.

## Experience

### Software Engineer

Aug 2025 – Present

SEDA G-Tech

Taiwan

- Developed scalable frontend applications using React.js, TypeScript, Next.js, Tailwind CSS, Redux Toolkit, and Zustand.
- Worked on healthcare and IoT monitoring systems with MQTT-based real-time sensor updates and dashboard visualization.
- Built reusable UI components, custom hooks, role-based access control, and responsive layouts to improve maintainability.
- Integrated REST APIs, cookie-based authentication, Clerk authentication, Better Auth, and internationalization using i18next.
- Implemented charts, reports, and activity dashboards using Recharts and Chart.js.
- Integrated payment gateways including Razorpay, Polar, and Stripe.
- Used AI-assisted development tools to speed up implementation, debugging, testing, refactoring, and documentation while maintaining ownership of architectural and technical decisions.
- Improved application performance by reducing unnecessary API calls, optimizing renders, and updating only changed state.
- Collaborated with backend engineers, designers, and QA teams to deliver production-ready features.

### Software Engineering Intern

Aug 2024 – Aug 2025

SEDA G-Tech

Taiwan

- Built responsive dashboards and monitoring tools using React.js, TypeScript, Tailwind CSS, and Shadcn UI.
- Implemented MQTT integration for live device status updates, notifications, and event-driven UI changes.
- Developed graphs and time-based analytics using Recharts and Chart.js for sensor and patient activity data.
- Worked with REST APIs, authentication, Redux Toolkit, Zustand, and frontend state management.
- Contributed to multilingual support and localization workflows using i18next.
- Fixed production bugs, improved frontend performance, and supported deployment workflows using Git.

## Education

### Master's Degree

Expected 2027

Yuan Ze University

Taiwan

### B.E. in Computer Science and Engineering

Aug 2021 – Jun 2025

Chandigarh University

Punjab, India

## Technical Skills

**Languages:** JavaScript, TypeScript, Java, Python, C++, C, Go

**Frontend:** React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, Shadcn UI, Recharts, Chart.js

**Backend:** Node.js, Express.js, REST APIs

**Databases:** MongoDB, MySQL, PostgreSQL

**Real-Time:** MQTT, WebSockets

**Authentication:** Clerk, Better Auth, JWT, Cookie-based Authentication

**Payment Integrations:** Razorpay, Polar, Stripe

**Tools:** Git, GitHub, Postman, Figma

## Achievements

- Converted from internship to full-time Software Engineer.
- Built production-level applications involving real-time systems, authentication, payment integration, and state management.
